(72)Inventor : NAGATSUKA SUMIYA

(54) DIGITAL STILL CAMERA

(57)Abstract:

PROBLEM TO BE SOLVED: To improve operability by reducing the time required for photographing in the case of photographing all or part of an object, while being overlapped and to prevent the overlapped parts from being interrupted.

SOLUTION: A characteristic extracted by an extract means 21 that extracts all or part of characteristic of an image signal recorded in a recording means 20 is displayed on a display means 19 together with an image based on an image signal of an object image going to be photographed. Furthermore, a synthesis means 23 synthesizes plural image signals recorded by the recording means 20 and displays the image based on them on the display means 19.

LEGAL STATUS

[Date of request for examination] 13.02.2003

[Date of sending the examiner's decision of rejection] 17.05.2005

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision
of rejection]

[Date of requesting appeal against examiner's
decision of rejection]

[Date of extinction of right]
